

Q17 — Function – Find the Greater of Two Numbers

```
CREATE OR REPLACE FUNCTION find_greater (a IN NUMBER, b IN NUMBER)
RETURN NUMBER AS
BEGIN
    IF a >= b THEN
        RETURN a;
    ELSE
        RETURN b;
    END IF;
END;
/

SET SERVEROUTPUT ON;

DECLARE
    result NUMBER;
BEGIN
    result := find_greater(45, 78);
    DBMS_OUTPUT.PUT_LINE('Greater number is: ' || result);

    result := find_greater(100, 50);
    DBMS_OUTPUT.PUT_LINE('Greater number is: ' || result);
END;
/
```

Expected Output:

Function created.

Greater number is: 78

Greater number is: 100
